

Note 1: Duro-Guard fan fold may be used over flute filler on a metal roof if span between flute filler and flute does not exceed 1/4 in. (6 mm).

Note 2: Flute filler must be either 1.5 lb (.68 kg) EPS or 2.0 lb (.91 kg) polyisocyanurate. Hold in place with at least one approved plate/fastener. High density wood fiberboard can not be used as flute filler.

Note 3: The use of this detail is not a fire-rated assembly. Refer to Duro-Last's UL TGFU.R10128 for approved fire-rated assemblies.
