

Note 1: Duro-Guard fan fold may be used over flute filler on a metal roof if span between flute filler and flute does not exceed 1/4 inch.

Note 2: Flute filler must be either 1.5 lb. EPS or 2.0 lb. polyisocyanurate. Hold in place with at least 1 approved Duro-Last plate/fastener. High density wood fiberboard can **not** be used as flute filler.

Note 3: The use of this detail is **not** a fire-rated assembly. Refer to Duro-Last's UL TGFU.R10128 for approved fire-rated assemblies.

REVISED:	11/22/17	METAL ROOF RECOVER
