

DURO-LAST[®] PVC DRAIN ASSEMBLY

DESCRIPTION:

The Duro-Last[®] PVC Drain Assembly (available in white only) is fabricated from a rigid exterior vinyl and has a black heavy duty cast iron dome. This easy to install assembly has brass inserts for better compression and is compatible with all types of piping and the Duro-Last roofing system.

The PVC drain assembly is packaged with a reducer fitting to accommodate either a 3 inch (76 mm) or 4 inch (102 mm) drain pipe and a Fernco rubber fitting to provide for use in all types and methods of construction.

The PVC drain assembly may be used as a replacement to existing clamping style drain assemblies or in new construction applications.

Duro-Last PVC drain assembly allows for free water flow and protection against clogs as well as quick installation. Other expanders or reducers may be attached for use with existing piping.

INSTALLATION:

1. Refer to detail drawing 2011 for installation information.
