

ZAMAC METAL ANCHORS

DESCRIPTION:

Zamac Metal Anchors are used for mechanical fastening of Duro-Last® parapet flashing and edge terminations into brick, hollow block and concrete.

Zamac Metal Anchors must not be used to fasten membrane to roof decks.

Zamac Metal Anchors are manufactured from a corrosion-resistant Zamac alloy (base metal of zinc and alloying elements of aluminum, magnesium and copper) with a carbon steel drive nail.

ORDERING:

Zamac Metal Anchors are packaged and sold in quantities of 1,000.

- Zamac Metal Anchors (Item #12411)

STORAGE AND HANDLING:

- Always store in a dry location protected from the elements.

PRECAUTIONS:

- A drill gun and hammer are required for installation. Wear proper personal protective equipment, such as gloves and eye protection.

INSTALLATION:

1. Pre-drill a 1/4-inch hole 1/2 inch deeper than the anchor body length.
2. Insert the anchor into the pre-drilled hole.
3. Drive the carbon steel drive nail into the anchor body with a hammer to expand it. Ensure that the drive nail's head is firmly seated against the anchor body.
