

# GEOTEXTILE SLIP SHEET

## DESCRIPTION:

Geotextile slip sheet provides a lightweight and cost-effective separation when overlaying an existing roof system or an incompatible insulation product such as polystyrene. The roll size is 15 x 360 ft (4.5 x 109.7 m). The slip sheet is made from 100% polypropylene fibers that are needle-punched to form a dimensionally stable fabric. This slip sheet cannot be used over gravel-surfaced or ballasted roofs.

The Geotextile slip sheet may be used over:

- Smooth or granular surfaced built-up roofs
- Modified bitumen
- Coal tar pitch
- Single-ply membranes such as PVC, CSPE (Hypalon), etc.
- Smooth sprayed urethane foam
- Acrylic and aluminum coatings
- Polystyrene insulations
- Shingles

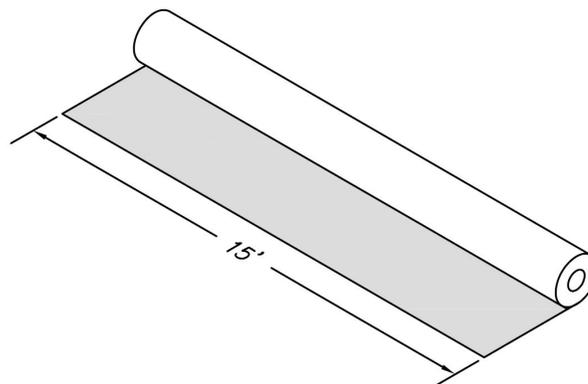

Refer to the “Getting Started” section of the Duro-Last® Specification Manual for additional information on substrate separation.

## MATERIAL SAFETY DATA SHEET:

Item Type: DalTex Nonwoven Polypropylene Fabric

## INSTALLATION:

1. The slip sheet must be installed on a clean and smooth surface, smooth side up.
2. Individual pieces must be overlapped 3 inches.
3. The slip sheet must be attached with Duro-Last approved fasteners, and 3-inch (76 mm) metal plates.
4. Place fasteners in each corner and along the overlap a maximum of 15 ft. (4.5 m) o.c.
5. Install a minimum of one fastener for curb or wall sections less than 4 ft. (1.2 m) in length and a minimum of two fasteners for sections between 4 ft. (1.2 m) and 15 ft. (4.5 m) in length.
6. When installing the slip sheet along the top of parapet walls, more fasteners may be necessary.

## NOTE:

- The rolls should be stored elevated and covered to keep them dry. Use tarps, if necessary, to protect from rain.
- Only install as much slip sheet as can be covered by the roof membrane by the end of the day or onset of inclement weather.

GENERAL INFORMATION	
<b>Packaged</b>	Roll
<b>Length</b>	360 ft. (109.7 m)
<b>Width</b>	15 ft. (4.5 m)
<b>Coverage</b> with 3-in. (7.5 cm) overlap	5,310 ft <sup>2</sup> (493.3 m <sup>2</sup> )
<b>Color</b>	Black
<b>Roll weight</b>	160 lb. (72.5 kg)
<b>Weight per area</b>	0.03 lb./ft <sup>2</sup> (0.15 kg/m <sup>2</sup> )
<b>Thickness</b>	45 mils (1.14 mm)
