

RHINOTRAC TOOL

DESCRIPTION:

The RhinoTrac tool is used for fastening of approved substrates with RhinoBond® Plates within Duro-Last® Roofing Systems. It dispenses RhinoBond Plates and Duro-Last #15 XHD Screws up to 6 inches in length.

The RhinoTrac tool is comprised of the RhinoTrac boot and universal drive system (interchangeable with the AccuTrac® and AccuSeam® boots). The boot has a plate well that can hold over 100 plates. The drive system has an anti-jam feeder tube that can be loaded with one fastener at a time.

BENEFITS:

- Ergonomic stand-up design
- Depth adjustment ring to eliminate over-driving and under-driving of fasteners
- Anti-jam design for plates and fasteners

ORDERING:

- 1 RhinoTrac tool (Item #1974)
- 500/box RhinoBond Plate (Item #1302)

STORAGE AND HANDLING:

- Always store in a dry location protected from the elements.

PRECAUTIONS:

- Read entire Owner's Manual (provided in box) prior to using the RhinoTrac tool.

OPERATING INSTRUCTIONS:

1. Complete operating instructions can be found within the Owner's manual.
