

ACCUTRAC® TOOL

DESCRIPTION:

The AccuTrac® tool is used for fastening of insulation and cover boards within Duro-Last® Roofing Systems. It dispenses AccuTrac Plates and #14 HD Screws or #15 XHD Screws up to 6 inches in length.

The AccuTrac tool is comprised of the AccuTrac boot and universal drive system (interchangeable with the RhinoTrac and AccuSeam® boots). The boot has a plate well that can hold over 100 plates. The drive system has an anti-jam feeder tube that can be loaded with one fastener at a time.

BENEFITS:

- Ergonomic stand-up design
- Depth adjustment ring to eliminate over-driving and under-driving of fasteners
- Anti-jam design for plates and fasteners

ORDERING:

- 1 AccuTrac tool (Item #1972)
- 1,000/bucket AccuTrac Plate (Item #1866)

STORAGE AND HANDLING:

- Always store in a dry location protected from the elements.

PRECAUTIONS:

- Read entire Owner's Manual (provided in box) prior to using the AccuTrac tool.

OPERATING INSTRUCTIONS:

1. Complete operating instructions can be found within the Owner's manual.
