

DURO-LAST[®] INSULATION PLATE

DESCRIPTION:

The Duro-Last[®] Insulation Plate is a 0.375 inch (9.5mm) thick, 3 inch (76.5mm) diameter distribution plate designed to hold insulation and underlayment boards under the Duro-Last roofing system. Duro-Last Insulation Plates are packaged and sold in quantities of 1,000.

The Duro-Last Insulation Plate includes a recessed 0.280 inch (7 mm) diameter hole in the center, keeping the head of the fastener from coming into contact with the Duro-Last roofing membrane. To maintain necessary strength and position, the Duro-Last Insulation Plate is manufactured with a thick center that embeds into the insulation and a thin flexible exterior to help reduce facer tear. In addition, there are tabs pressing against the fastener head to prevent the fastener from backing out.

The Duro-Last Insulation Plate is a long-lasting, durable plate that is available only from Duro-Last, Inc.

MATERIAL SAFETY DATA SHEET:

Product Identity: Duro-Last Insulation Plates

INSTALLATION:

1. Refer to details 1020 and 1030 installation information.

NOTE:

- Duro-Last Insulation Plates shall only be used to attach insulation or cover boards in mechanically fastened systems. They shall not be used in adhered systems.
